ADD-ON VIDEO CAMERAS & LIGHT SOURCES

Pentax offers Video Add-On Cameras and Light Sources for use with Pentax fiberscopes. A simple connection allows the endoscopist to view a sharp, clear video image on a monitor rather than through the fiberscope eyepiece. To ensure the clarity of this enhanced image, Pentax offers a variety of standard Halogen or Xenon Light Sources, with or without air/water capabilities, as well as a battery operated Light Source – making this line versatile as well as functional!
