

PORTABLE RECORDABLE ENDOSCOPY MiniVision

MiniVision FEES

Smaller is better!

MiniVision is a complete, portable recordable endoscopy system for FEES. Weighing less than 28 pounds, this system is housed in a lightweight steel case and includes:

- PSV-4000 Add-On Camera
- Sony Mini DV Recorder with 5.5" LCD Screen
- Light Source
- Soft Carrying Case
- Standard Wheeled Carrying Cart

Lightweight and compact, this portable system allows endoscopic evaluation of swallowing to be performed in any clinical environment – especially where space is at a minimum. Utilizing a single plug-in feature, it is easily set-up on a bedside table, making MiniVision the perfect system for nursing home and hospital room applications. This unit is small enough to be stored in a closet and can fit in the trunk of a car.

In addition, the spectacular digital images can be downloaded to a computer for patient files, hospital reports or educational purposes!
